

## AER | Acoustic Electronic Research

Loudspeakers made in Germany since 1985

AER has been developing and building the highest quality hi-fi components since 1985.

The Stuttgart-based company was founded by the designer Filip Keller, whose speaker systems are known for their extraordinary dynamics and purity of sound.

The high quality and excellent performance of AER products are the result of decades of research, uncompromising development and technical perfection. AER is the world leader in broadband technology, offering innovative speaker systems,
